

Project Rendering

NAPA VALLEY TRANSPORTATION AUTHORITY

VINE TRANSIT MAINTENANCE FACILITY

The 28,000 square-foot facility is situated on eight acres in southern Napa County and includes:

Six service bays and modern bus wash

A regional meeting center

A Transit Emergency Operations Center

Parking for transit vehicles, employees, and visitors

More space for bus maintenance with easier and safer access to fueling stations

A zero net energy photovoltaic system

Environmentally sustainable materials using LEED principles

NVRTA is building a new maintenance and administration facility to address the growing needs of the transit operations. The current facility is ill-equipped to handle the existing needs and future growth. The project will allow NVTA to maintain and expand transit service for the next 50 years.

Current Construction, February 2023

SCHEDULE	BEGIN	END
Pre-Construction Activities	March 2016	September 2019
Construction	January 2022	July 2024
In-Service	July 2024*	

* Project completion was September 2023, but the schedule has slipped because of electrical supply chain issues.
